

POWERSTOP®

EXTREME PERFORMANCE BRAKE SYSTEMS

Power Stop engineers the noise out of performance brakes...

Power Stop brakes are quiet and perform better than OE.

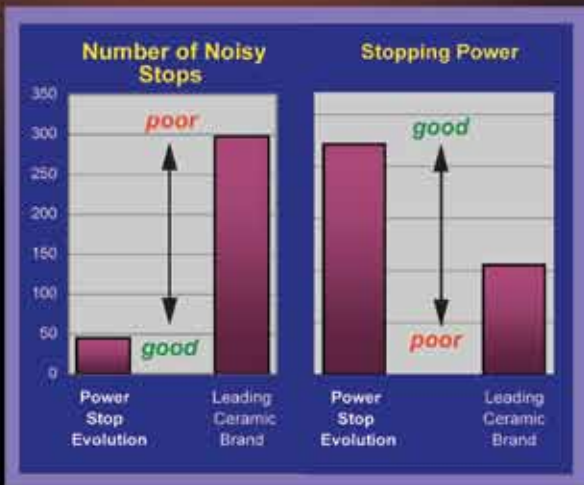

- Extreme Pad Bite for Fast Stops
- Fade Resistant at High Temperature
- Noise Dampened with Power Stop ANS Technology featuring rubber coated, constrained layer shims
- Made with Positive Mold Technology

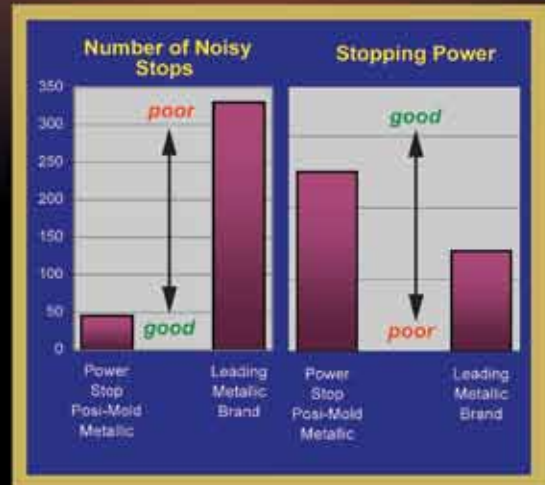

Evolution Clean Ride Ceramic Disc Brakes

Posi-Mold Quiet Ride Metallic Disc Brakes

Evolution Ceramic pads have 20% better stopping power than a leading brand. Quiet operation is assured with Power Stop ANS noise dampened shims.

Posi-Mold Metallic pads have 30% better stopping power than a leading brand. The pads are super quiet with Power Stop ANS noise dampened shims.

Noise test based on SAEJ2521 measuring noisy stops over 70dB on over 1400 stops. Stopping power is the coefficient of friction (μ) from the high temperature fade section of ISO NWI 26867. All tests performed by Link Testing.

POWERSTOP®

EXTREME PERFORMANCE BRAKE SYSTEMS

Solving the Toughest Brake Challenges

Trucks and SUV's Demand Professional Grade Brakes.

Z36 Extreme Truck and Tow Brake Pads

The Best Severe Duty Pads on the Market.

- Designed to resist high temperature brake fade on heavy GVW vehicles
- Long pad life
- Shorter stopping distance

Z36 pads offer 37% more brake torque than other leading brands with 40% longer pad life.

Z36 pads have substantially improved braking over OE or after-market replacement brake pads. Extreme Truck and Tow pads are designed for demanding thermal duty cycling of the brake system. Whether you drive in the hills, haul loads or trailers, Z36 pads will give you consistently shorter stops.
